# 2W|639nm OPSL Coherent laser module

## Laser Modules

|  |                     |
|--|---------------------|
| Minimal optical output:                | 2W                  |
| Centre wavelength:                     | 639nm               |
| Centre wavelength tolerance:           | ±1nm                |
| Spectral width:                        | <0.5nm              |
| Beam diameter:                         | 1mm                 |
| Beam divergence (horizontal/vertical): | 1.5mrad             |
| Linear polarisation:                   | >100:1 (horizontal) |
|  | 1.5/1               |
