

Water Screen - shield

Laser Display Accessories

Pump requirements:

1500 litres per minute @ 10 bar max.

Connector type:

B

Water discharged under high pressure through this device forms a half-spherical wall of water which is great projection surface for laser and video displays. It is suitable for outdoor applications on lakes, rivers and outdoor pools.

The approximate size of a projection surface is 25 x 10 meters (W x H).
